Project Name

In Our City

Functional Requirements

User Creation & User Anonymity (MVP 1) – I would like to be able to have a functioning site within Wordpress, where using pre-existing plugins and modules, a user would be able to create their user profile, and have it technically been considered anonymous to the public.

User Interaction with Forum Posts (MVP 2) – My hope is that by MVP 2 user accounts are sorted out and working to the point that when implementing modules with Forum capabilities, individual users will be able to create unique posts and comments on the posts they view.

Stories and Resources (MVP 3) – Ideally, I would like to directly showcase individual forum posts on the front page, but if I'm unable to bring them over neatly it may have to be a self-maintained service.
Additionally, I would like to have working & beneficial resources on the front page regarding my main topic of focus of inner-city schools comparatively to that of newly developed schools.

Designing & Formatting (MVP 3) – To complete the project, additionally by MVP 3 I would like to have this properly designed & formatted so that it looks like a professional website or forum page that could be added as a tool or platform.

Technical/Performance Requirements

User Roles & Permissions – The hope is if time permits based on the scope of the project, to give various degrees of user's different roles and permissions. This would mean admins, moderators, teachers, and regular users all would have different permissions as to what they can & cannot do within this site.

Moderation and Filtration of Posts & Users – As mentioned above, ideally there would be some form of moderation to remove toxic posts and/or users who are purposely spreading toxicity or negativity on the forum.

Verification of Users – The hope is if time permits, to see if there is the possibility of users (teacher's specifically) to provide verification that they are in fact an educator. And thus, grant them the 'Teacher/Educator' Role as mentioned above, which would give them the permission/capability to post to the forums.
