

Project Status report

Name: Carter Brezinski
Community (UN SD goal): #4 – Quality Education
MVP #: 1
Sprint cycle dates: 11/2/2021

Project Name In Our City

Blurb I am creating a forum & resource learning app to bring more awareness to the situations of inner-city schools in Regina;
The UN Sustainable Development Goal primarily focused on in this project is goal #4 – Quality Education, there is a strong likelihood that other goals will potentially be incorporated or mentioned later.

For Week Ending 11/2/2021

Project Status Yellow/Green

Status Description The reason I feel yellow/green is due to the fact that while I am proud of how the front page of my website looks and functions, I feel slightly behind due to my midterms and feel like I could've done more in this past week.

Activities—During the past sprint cycle

Link to a preview/demo of the current progress of the In Our City project homepage so far:

<https://youtu.be/OtkPcT0gms>

During the past sprint, the following activities were done:

- Initial creation of the WordPress. The focus during this was to create, format, and design the home page so that it contained all information and previously stated.
- Brief idea mock-ups for a logo design.
- Research and integration of the bbPress plugin, as it supports modular forum functionality that is friendly and easy to understand for both users and developers.
- Budget consideration for the WordPress domain name.
- Update Github and wiki to include all necessary documentation.

Project Issues

- A current issue with the progress of the project is the matter of domain names. If I would like a professional domain name like 'InOurCity.ca or InOurCity.Wordpress.ca' it will require me to pay to use their domains. Which isn't ideal but something I am willing to do.

Project Changes

- To make my project more Regina focused, I am also going to include the addition of 'volunteer Regina', specifically their schools resource page. The volunteer Regina webpage has information and resources for different events all over Regina, but I plan to focus on including just those involving schools.

Activities—Planned for Next Week

In the upcoming weeks, I am to use the bbPress plugin to create pages for user registration, forum posts, and have a few examples forum posts available to view. If it makes sense, I will pay for a domain and publish the website so that it can be actively viewed at any time.

Reflection

- Do you feel "on track"?
Due to midterms in this past week, I feel slightly behind, as indicated by my yellow/green progress.
 - What progress do you particularly feel good (great) about?
Overall I feel like the front page of my website looks both aesthetically pleasing, functional, and I'm rather happy that it includes everything I hoped to have included on there and more.
 - What barriers (if any) do you feel is/are a current impediment to success?
The only real barrier is deciding on which domain to move forward with using.
 - What help (if any) do you require to move positively forward?
I cannot think of anything at this current time that I require or need help with to successfully move forward.
 - What questions or concerns do you have (if any)?
I cannot think of any concerns or questions at this current time.
-
